3.2 Practical Training Requirements for Facilities and Resources

Practical training is carried out on the basis of contracts with specialized organizations that fit the following requirements: able to provide facility and resource that comply with the current fire safety rules and regulations and facilitate all types of disciplinary and interdisciplinary training, practical work and research activities of students within the scope of practical training; operate in a way that corresponds to the occupational competencies acquired within the framework of the educational program.

Practical training aimed at obtaining primary occupational skills and professional experience is carried out on specific premises that meet requirements for facilities, resources, and educational materials and include the following:

Premises and subdivisions of a medical facility fitted with medical equipment and suitable for independent work within the scope of practical training, as well as continuous assessment.

Classroom for interim assessment is equipped with specialized (classroom) furniture, teaching aids for studying and assessment of practical skills.

Equipment status of selected premises and premises for independent work is reflected on the page for facility and resource requirements of the basic educational program of higher education (specialist's degree program) on the educational organization website.

3.3. List of Information Technologies, Information and Reference Systems, Licensed and Free Software (Including Domestically-developed Software) Used for Education During Practical Training Period:

1. PolycomTelepresence M100 Desktop Conferencing Application (Videoconference system)
2. SunRav Software tTester
3. 7-PDF Split & Merge
4. ABBYYFineReader
5. Kaspersky Endpoint Security
6. INDIGO online testing system
7. Microsoft Windows 7
8. Microsoft Office Pro Plus 2013
9. 1C:University
10. GARANT system
11. MOODLE (Modular Object-Oriented Dynamic Learning Environment)

4. ASPECTS OF IMPLEMENTATION OF PRACTICAL TRAINING FOR STUDENTS WITH DISABILITIES AND SPECIAL NEEDS

4.1 Requirements of Practical Training for Students with Disabilities and Special Needs.

Students with disabilities are provided with printed and/or electronic educational materials that are adapted to their individual needs and abilities.

4.2 Aspects of Implementation of Practical Training for Students with Disabilities and Special Needs

For students with disabilities and special needs, if a written application is submitted, the practical training is carried out taking into account health limitations, individual capabilities and medical status (hereinafter referred to as individual characteristics) of the student. Location of

practical training for people with disabilities and special needs is selected at the personal request of the student, taking into account the accessibility requirements. Academic training/practical placement location for people with disabilities and special needs is chosen taking into account the recommendations of the medical and social assessment that are reflected in the individual rehabilitation program with consideration of working conditions and kinds of labor.

Compliance with the following general requirements is ensured: teaching aids for collective and individual use are provided, required technical assistance is provided by an assistant, buildings and premises where the practical training is carried out meet accessibility requirements, other arrangements lack of which makes it impossible or difficult to complete the practical training are made.

When practical training is carried at the written application of the student, the following general requirements are met: practical training for students with disabilities and special needs is carried out at the same location as for students who do not have disabilities, if this does not cause difficulties for the latter; an assistant (assistants), who provide(s) students with the necessary technical assistance taking into account individual characteristics of the student, is (are) provided at the written application; necessary teaching aids are provided, taking into account individual characteristics of the student.

All internal policies and procedures of FSBEI HE PSMU of the Ministry of Health of Russia on the implementation of practical training are made available to students with disabilities in a form accessible to them.

Format of the interim assessment of academic performance within the scope of practical training conducted for students with disabilities and special needs is selected taking into account individual characteristics (orally, by writing on paper, by typing on a computer, as a test, etc.). The duration of the interim assessment in relation to the established duration is increased at the written application of the student with disabilities. Time limit for the student's preparation for the test is increased by at least 0.5 hours.

5. STAFFING REQUIREMENTS OF PRACTICAL TRAINING

Academic teaching personnel that ensure the implementation of **B2.O.02(Y) Introductory practical training (Psychology of Doctor-Patient communication)** meet the requirements of the Federal State Educational Standard of Higher Education for the 31.05.01 General Medicine for international students (in English) specialty; list of the aforementioned personnel is available on the website of the educational organization.
