## SUBJECT GUIDE FOR TEACHERS AND STUDENTS FOR

### **Б1.О.27 Obstetrics**

(Name of discipline)

**Specialty**

**31.05.03 Dentistry**  
**for international students (in English)**  
(code, name)

**Degree**

Specialist's degree

**Profile**

02 "Healthcare"  
(in the field of providing health care in  
patients with dental pathology)

**Mode of study**

**Full-time**

**Period of mastering the BEP**

**5 years**  
(nominal length of study)

**Institute**

of Obstetrics and Gynecology

Subject guide for teachers and students for **Б1.О.27 Obstetrics** is based on:

1) Federal State Educational Standard of Higher Education for the specialty approved by the Order No. 988 of Ministry of Science and Higher Education of the Russian Federation dated August 12, 2020.

2) Curriculum for the 31.05.03 Dentistry for international students (in English), profile 02 "Healthcare" (in the field of providing health care in patients with dental pathology), approved by the Academic Council of FSBEI HE PSMU of the Ministry of Health of Russia Report No. 8/24-25 dated March 31, 2025.

Subject guide for teachers and students for the discipline was developed by the writing team of the Department of Obstetrics and Gynecology of the FSBEI HE PSMU of the Ministry of Health of Russia, under the guidance of the head of the department Candidate of Medical Sciences, Associate Professor Matyushkina L.S.

**Developed by:**

<hr/> <b>Head of Department</b> <hr/> (position held)	<hr/> Candidate of Medical Sciences, Associate Professor <hr/> (academic degree, academic title)	<hr/> Matyushkina L.S. <hr/> (full name)
<hr/> <b>Assistant Professor</b> <hr/> (position held)	<hr/> Candidate of Medical Sciences <hr/> (academic degree, academic title)	<hr/> Svintsova E.S. <hr/> (full name)
<hr/> <b>Assistant Professor</b> <hr/> (position held)	<hr/> Candidate of Medical Sciences <hr/> (academic degree, academic title)	<hr/> Talyzina E.A. <hr/> (full name)

## 1. GENERAL PROVISIONS

Subject guide for **B1.O.27 Obstetrics** is a set of recommendations and explanations that facilitate to optimal organization of mastering this discipline.

Regular analysis of lecture materials and work with end-of-the-text questions are necessary for better understanding of the material and systematization of knowledge of **B1.O.27 Obstetrics**. Particular attention should be paid to emerging questions, confusing terms, and conflicts of points of view during the independent review of the lecture material. If necessary, a student should contact the teacher for advice. Lecture material streamlines students' thinking, while practical classes provide deeper insight into the material of the discipline.

Special attention should be paid to the content of the main provisions and conclusions, explanation of phenomena and facts, and clarification of the practical application of theoretic aspects of topic when preparing for a practical class. During this process students should aim to understand and remember the main provisions of the material under consideration, examples provided, as well as understand the illustrative material.

Collections of assessment tools are used to organize independent study of topics (questions) of the discipline.

Independent work of students is facilitated by the following:

1. availability and accessibility of the necessary educational and reference material;
2. a system of regular quality control of completed independent work;
3. availability of teacher's advice.

Subject guides for self-study are presented as literary sources and subject guides for the students. Subject guides for independent work of students include a list of library resources of the educational institution and other materials accessible to students.

Independent work is a type of in-person extracurricular work of teachers and students of **B1.O.27 Obstetrics**. Control of independent work is conducted by the leading teacher. Evaluation of independent work results is taken into account when conducting interim examination of students throughout the **B1.O.27 Obstetrics** course.

Continuous assessment during the **B1.O.27 Obstetrics** course is implemented in order to check indicators of achieving competencies, to stimulate students' academic work, and improve methods of mastering new knowledge. Continuous assessment during the **B1.O.27 Obstetrics** course is conducted during the semester to assess all types and sections of the academic discipline that encompass the competencies developed by the discipline: classroom questioning, working with tests, and writing reports. Continuous assessment of students' knowledge and results of their preparation for practical classes is conducted during every class session.

Interim assessment aims to determine the level of mastery of competency indicators. It is conducted in the pass/fail test format after the student has mastered all sections of **B1.O.27 Obstetrics** and takes into account learning outcomes for all types of student work over the entire period of mastering the **B1.O.27 Obstetrics** course.

Time allotted for interim assessment is indicated in the schedule.

Assignments given during practical classes, as well as assignments aimed to prepare students for continuous and interim assessment, are included in the collection of assessment tools for **B1.O.27 Obstetrics**. If necessary, students should contact the teacher for advice. It is necessary to thoroughly think over questions that need clarification before seeking teacher's advice.

## 2. SUBJECT GUIDES FOR LECTURE CLASSES

Table 1. Subject Guides for **B1.O.27 Obstetrics** Lectures

<b>Topic No.1 Pregnancy-related changes in the female body. Female pelvis as an anatomical and obstetrical object. Fetus as the object of labor. Obstetrics terminology. Examination methods</b>	
Duration of the lecture (in academic hours):	2
<p>Purpose of the lecture:</p> <ol style="list-style-type: none"> <li>1. tell students about female pelvis as an anatomical and obstetrical object, examination methods, physiological pregnancy-related changes in the female body;</li> <li>2. define relevant terminology: gestational dominance, signs of impending labor, bearing-down, contractions, and the mechanism of labor;</li> <li>3. examine methods of special obstetric examination, laboratory examination methods, and screening.</li> </ol>	
<p>Lecture plan, order of presentation of its sections:</p> <ol style="list-style-type: none"> <li>1) Obstetric Examination Methods: general and specialized</li> <li>2) Physiological changes in pregnancy</li> <li>3) Pain management</li> <li>4) Labor and delivery</li> </ol>

### Topic No.3 Preeclampsia

Duration of the lecture (in academic hours):

2

Purpose of the lecture:

1. tell students about main terms and concepts related to the topic;
2. define relevant terminology: preeclampsia, eclampsia, their associated risk factors, and clinical stages;
3. examine diagnostic methods, labor management, prognosis, and prevention strategies.

Lecture plan, order of presentation of its sections:

- 1) Preeclampsia
- 2) Etiology, early manifestations
- 3) Eclampsia, etiology, pathogenesis, classification
- 4) Prevention, treatment

Recommended reading:

1. Obstetrics: textbook [Electronic Resource] Savelyeva G.M., Shalina R.I., Sichinava L.G., Panina O.B., Kurtser M.A. - Moscow: GEOTAR-Media, 2020. - 576 p.URL: <http://www.studentlibrary.ru>
2. Obstetrics: National Guidelines [Electronic Resource] Ed. by G. M. Savelieva, G. T. Sukhikh, V. N. Serov, V. E. Radzinsky. - 2nd ed., rev. and enl. - Moscow: GEOTAR-Media, 2022. - 1080 p URL: <http://www.studentlibrary.ru>

### Topic No.4 Pregnancy loss (miscarriage)

Duration of the lecture (in academic hours):

2

Purpose of the lecture:

1. tell students about main terms and concepts related to the topic;
2. define relevant terminology: miscarriage and prolonged pregnancy;
3. examine diagnostic and treatment methods for miscarriage and prolonged pregnancy.

Lecture plan, order of presentation of its sections:

- 1) Definition of preterm and prolonged pregnancy
- 2) Etiology
- 3) Classification of preterm and prolonged pregnancy
- 4) Principles of treatment for preterm and prolonged pregnancy based on clinical recommendations

### **Topic No.5 Physiological postpartum period**

Duration of the lecture (in academic hours):

2

Purpose of the lecture:

1. tell students about main terms and concepts related to the topic;
2. define relevant terminology: physiological postpartum period;
3. examine diagnostic and prophylactic approaches to postpartum complications.

Lecture plan, order of presentation of its sections:

- 1) Normal puerperium and its duration
- 2) Physiological changes in the postpartum woman
- 3) Prophylaxis of postpartum complications

Recommended reading:

### **Topic No.6 Modern methods of family planning**

Duration of the lecture (in academic hours):

2

Purpose of the lecture:

1. tell students about family planning and modern contraceptive methods;
2. define relevant terminology: modern contraceptive methods and family planning;
3. examine methods of selection and indications for various contraceptive methods.

Lecture plan, order of presentation of its sections:

- 1) Classification of contraceptive methods
- 2) Indications, contraindications, and complications of contraceptive methods
- 3) Concept of family planning services
- 4) Emergency contraception

### Topic No.3 Preeclampsia

Duration of the practical class (in academic hours):

6

Purpose of the practical class:

1. consolidate acquired knowledge on the topic;
2. during the discussion, outline key terms and concepts;
3. thoroughly go over definitions and concepts mentioned in lectures;
4. study patterns of diagnosis, treatment, and prevention;
5. develop an understanding of approaches to the prevention and treatment of preeclampsia and eclampsia.

Practical classes requirements: classrooms equipped with multimedia equipment, blackboards, and subject guides for the discipline.

Independent work of the student: writing a research paper, preparing a report on the lecture, working with study materials.

Methods of evaluation of acquired knowledge and skills: discussion on reports, classroom questioning, tests.

## 4. GUIDELINES FOR CONTINUOUS AND INTERIM ASSESSMENT

Table 3. Guidelines for Conducting Continuous and Interim Assessment during the **B1.O.27 Obstetrics** Course

Type of assessment	Assessment format
Continuous assessment	<ul style="list-style-type: none"><li>- conducting and evaluating oral or written quizzes during lectures and practical classes;</li><li>- assessment and evaluation of completion and results of assignments given during practical classes;</li><li>- assess and evaluate completion and results of individual assignments and exam tasks given during practical classes;</li><li>- assessment and evaluation of lecture notes quality.</li></ul>

Interim certification

is conducted in the oral exam format; it allows to assess the development of students' competencies correlating with types of professional activity.

## **5 ASPECTS OF THE IMPLEMENTATION OF THE COURSE FOR STUDENTS WITH DISABILITIES AND SPECIAL NEEDS**

### **5.1. Availability of accessible environment**

For students with disabilities and special needs, if a written application is submitted, lectures and practical classes are carried out taking into account health limitations, individual capabilities and medical status (hereinafter referred to as individual characteristics) of the student. Compliance with the following general requirements is ensured: teaching aids for collective and individual use are provided, required technical assistance is provided by an assistant, buildings and premises where lectures and practical classes are taking place meet accessibility requirements, other arrangements lack of which makes it impossible or difficult to master the discipline are made.

### **5.2. Compliance with general requirements**

When lectures and practical classes are carried out at the written application of the student, the following general requirements are met: lectures and practical classes for students with disabilities and special needs take place at the same location as for students who do not have disabilities, if this does not cause difficulties for students; an assistant (assistants), who provide(s) students with the necessary technical assistance taking into account individual characteristics of the student, is (are) provided; necessary teaching aids are provided, taking into account individual characteristics of the student.

5.3. Availability of the internal policies and procedures of FSBEI HE PSMU of the Ministry of Health of Russia to students with disabilities in a form accessible to them.

All internal policies and procedures of FSBEI HE PSMU of the Ministry of Health of Russia concerning the discipline are made available to students with disabilities in a form accessible to them.

5.4. Increase in the duration of interim assessment of students with disabilities and special needs in relation to the established duration

Format of the interim assessment of academic performance within the scope of the discipline for students with disabilities and special needs is selected taking into account individual characteristics (orally, by writing on paper, by typing on a computer, as a test, etc.). The duration of the interim assessment in relation to the established duration is increased at the written application of the student with disabilities. Time limit for the student's preparation for the test is increased by at least 0.5 hours

## **6. STAFFING REQUIREMENTS OF THE DISCIPLINE**

Academic teaching personnel that ensure the implementation of the discipline education process meet the requirements of the Federal State Educational Standard of Higher Education for the 31.05.03 Dentistry for international students (in English) specialty; list of the aforementioned personnel is available on the website of the educational organization.
