1. GENERAL PROVISIONS

1.1. Purpose and Objectives of the Practical Training **B2.C.07(P) Clinical practice in general practice dentistry**

Purpose Consolidation and deeper insight into knowledge gained during theoretical training, acquisition of skills necessary for using medical equipment and instruments required for primary health care.

Gaining experience in independent professional work with direct participation in the activities of a medical organization.

Development and enhancement of competencies necessary for performing work activities within the framework of labor functions of **02.005 Dentist (General Dental Practitioner) Occupational standard**.

In addition, the **objectives** of practical training **B2.C.07(P) Clinical practice in general practice dentistry** are

- to consolidate and deepen knowledge gained while studying the disciplines “Orthopedic dentistry”;
- to develop practical skills of communication with patients, taking into account ethics and deontology, depending on the pathology and individual characteristics of patients;
- to develop the competences, necessary for professional activity of a dentist, capable of solving typical professional tasks, including emergency and urgent care.

1.2 Practical Training B2.C.07(P) Clinical practice in general practice dentistry as a Part of the Basic Educational Program of Higher Education of the Specialty 31.05.03 Dentistry for foreign students (English-language program), profile 02 "Healthcare" (in the field of providing health care in patients with dental pathology).

1.2.1 B2.C.07(P) Clinical practice in general practice dentistry is a part of Block 2 “Academic (educational) training / practical placement” of the 31.05.03 Dentistry for foreign students (English-language program) specialty curriculum.

1.2.2 Practical training is carried out during semester No. 9.

Type of practical training: practical placement;

Practical training method: stationary;

Practical training format: continuous.

1.3 Planned learning outcomes of practical training, correlated with the planned outcomes of mastering the basic educational program of higher education for specialty 31.05.03 Dentistry for foreign students (English-language program), profile 02 "Healthcare" (in the field of providing health care in patients with dental pathology).

Name of Competency Category (Group) / Labor function	Code and Name of Competency	Competency Indicators
General Professional Competencies		
Diagnosis and treatment	GPC-5. Able to examine a patient and make a diagnosis	AI.GPC-5 ₁ - examines the patient using clinical, laboratory and special instrumental methods AI.GPC-5 ₂ - provides a comprehensive evaluation to determine the overall health and functionality of organs and systems to decide if there are no contraindications that might preclude complex and reconstructive dental manipulations AI.GPC-5 ₃ - evaluates the results of the exam to make a diagnosis
	GPC-6. Able to administer and control the effectiveness and	AI.GPC-6 ₁ - creates a treatment plan, administers dosages of medication as well as

	safety of non-pharmacological and pharmacological therapies	non-pharmacological treatment regimens adhering to treatment requirements AI.GPC-6 ₂ - monitors therapy effectiveness and adjusts treatment regimens as necessary, utilizes various forms of medication tailored to specific dental treatments AI.GPC-6 ₃ - identifies contraindications and potential adverse events related to medication administration
Professional Competencies		
A/01.7 Patient examination. Making a diagnosis	PC-1 ability and willingness to implement activities aimed at diagnosing dental diseases using digital health methods	AI.PC-1 ₁ - identifies basic pathologic conditions, symptoms, syndromes in patients with dental diseases AI.PC-1 ₂ - interprets and evaluates the information received from patients (their relatives/legal representatives), primary and re-examination data, as well as laboratory and instrumental investigations in patients with dental diseases AI.PC-1 ₃ - applying the methods of digital computerized and hardware diagnostics of dental diseases
A/02.7 Prescribing and monitoring the effectiveness and safety of non-pharmacological and pharmacological therapies	PC-2 ability to administer and apply modern methods and/or digital technologies to treat dental patients as well as monitor the effectiveness and safety of the treatment	AI.PC-2 ₁ - develop treatment plans for dental patients aligning with clinical recommendations, treatment protocols, and medical care procedures and health care standards AI.PC-2 ₂ - demonstrates proficiency in administering non-pharmacological and pharmacological therapies and other treatment methods to dental patients, monitors the efficacy and safety of these methods AI.PC-2 ₃ - proficiently uses modern methods and/or digital technologies to treat dental diseases

Planned learning outcomes of practical training are represented by knowledge, skills, abilities and experience, characterize the stages of developing competencies and ensure achievement of the planned outcomes of mastering the basic educational program. Learning outcomes of a discipline are correlated with indicators of achieving the competence.

3.2 Practical Training Requirements for Facilities and Resources

Practical training is carried out on the basis of contracts with specialized organizations that fit the following requirements: able to provide facility and resource that comply with the current fire safety rules and regulations and facilitate all types of disciplinary and interdisciplinary training, practical work and research activities of students within the scope of practical training; operate in a way that corresponds to the occupational competencies acquired within the framework of the educational program.

Practical training aimed at obtaining primary occupational skills and professional experience is carried out on specific premises that meet requirements for facilities, resources, and educational materials and include the following:

Premises and subdivisions of a medical facility fitted with medical equipment and suitable for independent work within the scope of practical training, as well as continuous assessment.

Classroom for interim assessment is equipped with specialized (classroom) furniture, teaching aids for studying and assessment of practical skills.

Equipment status of selected premises and premises for independent work is reflected on the page for facility and resource requirements of the basic educational program of higher education (specialist's degree program) on the educational organization website.

3.3. List of Information Technologies, Information and Reference Systems, Licensed and Free Software (Including Domestically-developed Software) Used for Education During Practical Training Period:

1. PolycomTelepresence M100 Desktop Conferencing Application (Videoconference system)
2. SunRav Software tTester
3. 7-PDF Split & Merge
4. ABBYYFineReader
5. Kaspersky Endpoint Security
6. INDIGO online testing system
7. Microsoft Windows 7
8. Microsoft Office Pro Plus 2013
9. 1C:University
10. GARANT system
11. MOODLE (Modular Object-Oriented Dynamic Learning Environment)

4. ASPECTS OF IMPLEMENTATION OF PRACTICAL TRAINING FOR STUDENTS WITH DISABILITIES AND SPECIAL NEEDS

4.1 Requirements of Practical Training for Students with Disabilities and Special Needs.

Students with disabilities are provided with printed and/or electronic educational materials that are adapted to their individual needs and abilities.

4.2 Aspects of Implementation of Practical Training for Students with Disabilities and Special Needs

For students with disabilities and special needs, if a written application is submitted, the practical training is carried out taking into account health limitations, individual capabilities and medical status (hereinafter referred to as individual characteristics) of the student. Location of practical training for people with disabilities and special needs is selected at the personal request of the student, taking into account the accessibility requirements. Academic training/practical placement location for people with disabilities and special needs is chosen taking into account the recommendations of the medical and social assessment that are reflected in the individual rehabilitation program with consideration of working conditions and kinds of labor.

Compliance with the following general requirements is ensured: teaching aids for collective and individual use are provided, required technical assistance is provided by an assistant, buildings and premises where the practical training is carried out meet accessibility requirements, other arrangements lack of which makes it impossible or difficult to complete the practical training are made.

When practical training is carried at the written application of the student, the following general requirements are met: practical training for students with disabilities and special needs is carried out at the same location as for students who do not have disabilities, if this does not cause difficulties for the latter; an assistant (assistants), who provide(s) students with the necessary technical assistance taking into account individual characteristics of the student, is (are) provided at the written application; necessary teaching aids are provided, taking into account individual characteristics of the student.

All internal policies and procedures of FSBEI HE PSMU of the Ministry of Health of Russia on the implementation of practical training are made available to students with disabilities in a form accessible to them.

Format of the interim assessment of academic performance within the scope of practical training conducted for students with disabilities and special needs is selected taking into account individual characteristics (orally, by writing on paper, by typing on a computer, as a test, etc.). The duration of the interim assessment in relation to the established duration is increased at the written application of the student with disabilities. Time limit for the student's preparation for the test is increased by at least 0.5 hours.

5. STAFFING REQUIREMENTS OF PRACTICAL TRAINING

Academic teaching personnel that ensure the implementation of **B2.C.07(P) Clinical practice in general practice dentistry** meet the requirements of the Federal State Educational Standard of Higher Education for the 31.05.03 Dentistry specialty; list of the aforementioned personnel is available on the website of the educational organization.

Type of tutorial work	Forms and approaches to tutorial work	Assessment criteria
Assistance in personal growth	Overt Talks and problem-centric debates aimed at promotion of healthy lifestyle. Participation in interdepartmental conferences aimed at formation of healthy lifestyle and development of skills necessary to preserve and improve health.	Portfolio
	Covert – creating atmosphere and infrastructure. Developing a culture of healthy lifestyle, the ability to preserve and improve health. Creating atmosphere of kindness and respect with a high level of communication during implementation of the discipline.	
Civic position and values	Overt Conducting events that facilitate development of civil culture (roundtable discussions, discussions/debates, and talks). Short discussions on current significant events in case the latter occur.	Portfolio
	Covert Focusing on civic values-oriented position and legal awareness. Cultivating mindful social position during professional activity.	
Social values	Overt Highlighting aspects of organization of healthy lifestyle based on health-preserving technologies. Highlighting ecology-related questions, environmental issues as a factor affecting population health and select population risks.	Portfolio
	Covert Identification in social structure during period of education and in professional activity.

1. Students in the specialty 31.05.03 Dentistry for foreign students (English-language program) master the practical training program in semester No.8.

Purpose: Consolidation and deeper insight into knowledge gained during theoretical training, acquisition of skills necessary for using medical equipment and instruments required for primary health care.

Gaining experience in independent professional work with direct participation in the activities of a medical organization.

Development and enhancement of competencies necessary for performing work activities within the framework of labor functions of 02.005 Dentist (General Dental Practitioner) Occupational standard.

2. Content of practical training:

- Briefing on occupational health and safety, fire safety, and internal work regulations.

Familiarization with the structure of the medical institution, the organization of medical, diagnostic, and auxiliary departments, processing and analysis of the information received. Preparation and coordination of the work schedule (plan) for the practical training with the practical training supervisor

- Work as a dental assistant in dental clinics and polyclinics: supervision of patients (5-6 people) under the supervision of a dentist (initial examination, drawing up an examination and treatment plan, maintaining medical records)

- Preparing and conducting talks with patients on the most pressing issues of dental disease prevention. Writing a student research paper. Preparing a report and summarizing the results of the practical training.

- Completing reporting documentation. Obtaining feedback from the practice supervisor. Preparing for interim assessment

- Simulation Training module

3. Planned practical training outcomes:

When mastering the practice, the student must

Know:

- anatomical and physiological characteristics of maxillofacial area; etiology, pathomorphology, classification, clinical manifestation, and differential diagnosis of diseases of hard dental tissues and periodontium;

Be able to:

- prepare treatment tactic and plan for patients with dental pathology of maxillofacial area, taking into account somatic pathology, formulate indications for selected treatment method, present arguments for the selected treatment plan and patient management tactic, treatment measures, determine the necessity of referring the patient to healthcare specialists;

Master:

- skills of selecting the most reasonable treatment tactic; skills of developing treatment plan for patients with dental pathology of maxillofacial area, assessing possible complications.

4. Assessment criteria for the level of professional competencies developed during the practical training period.

Practical training results is written into the student's transcript by the practical training supervisor (provided by FSBEI HE PSMU of the Ministry of Health of Russia); the final grade is based on the results of interim assessment in the form of test, evaluation of the Practical Training Log, characteristics of the student's work, and the results of the interview conducted by the practical training supervisor.

Forms of assessment of the level of professional competencies implemented during the practical training period:

1. Practical Training Log.
2. Review of the training supervisor.
3. Test results.
4. Individual assignment.
5. Student research activity
6. Observing sanitary and anti-epidemic regimen requirements

"Very good" - threshold or high level of competence formation in period of practice, high level of competency achievement indicators, active approach to solving professional tasks of varying degree of complexity provided for by a program of practice in accordance with the FSES HE and occupational standard.

"Good" - threshold or high level of competence formation, in period of practice, adequate level of competency achievement indicators, adequate degree of practical skills, adequate ability to solve standard professional tasks provided for by the practice program in accordance with the FSES HE and occupational standard.

"Satisfactory" - threshold level of competence formation in period of practice, threshold level of competency achievement indicators, degrees practical skills are sufficient to solve typical professional tasks provided for by the practice program in accordance with the FSES HE and occupational standard and/or qualification characteristics.

"Unsatisfactory" - threshold or lower level of formation competencies during the practice period, low level of competency achievement indicators, the level of knowledge and the degree of practical skills are not enough to solve standard professional tasks provided for by the program of practice in accordance with professional standard.
