PRACTICAL TRAINING WORK PROGRAM

Type of practical training Academic training

B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)

Credit value

3 credits / 2 weeks
(credit points/ weeks)

Format of practical training

continuous
(continuous/ discrete)

Practical training method

stationary
(stationary/on-site)

Specialty

**31.05.01 General Medicine
for international students (in English)**

Degree

Specialist's degree

Profile

02 "Healthcare"
(in the field of providing primary health care to the population in medical organizations: polyclinics, outpatient clinics, inpatient/outpatient facilities of the municipal health care system)

Mode of study

Full-time

Period of mastering the BEP

6 years
(nominal length of study)

Institute

of Clinical Neurology and Medical Rehabilitation

Academic training program for **Б2.О.03(У) Introductory practical training (Medical rehabilitation and disease prevention)** is based on:

1) Federal State Educational Standard of Higher Education for the specialty approved by the Order No. 988 of Ministry of Science and Higher Education of the Russian Federation dated August 12, 2020.

2) Curriculum for the 31.05.01 General Medicine for international students (in English), profile 02 "Healthcare" (in the field of providing primary health care to the population in medical organizations: polyclinics, outpatient clinics, inpatient/outpatient facilities of the municipal health care system), approved by the Academic Council of FSBEI HE PSMU of the Ministry of Health of Russia, Report No. 8/24-25 dated March 31, 2025.

Practical training work program was developed by the writing team of the Institute of Clinical Neurology and Medical Rehabilitation of the FSBEI HE PSMU of the Ministry of Health of Russia, under the guidance of the director of the institute, Candidate of Medical Sciences Shestopalov E.Yu.

Developed by:

<u>Assistant professor</u> (position held)	<u>Candidate of Medical Sciences, Associate professor</u> (academic degree, academic title)	<u>Kuzmina T.N.</u> (full name)
<u>Assistant professor</u> (position held)	<u>Candidate of Medical Sciences</u> (academic degree, academic title)	<u>Pavlushchenko E.V.</u> (full name)
<u>Assistant professor</u> (position held)	<u>Candidate of Medical Sciences</u> (academic degree, academic title)	<u>Kuznetsova G.V.</u> (full name)

1. GENERAL PROVISIONS

1.1. Purpose and Objectives of the Practical Training *B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)*

Purpose Consolidation and deeper insight into knowledge gained during theoretical training, acquisition of skills necessary for handling medical equipment, gaining experience of independent professional activity, as well as development of competencies necessary for performing work activities within the framework of labor functions of *02.009 Physician, M.D. (primary care physician, district doctor) Occupational standard*.

In addition, the **objectives** of academic training *B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)* are

- consolidation and deepening of knowledge on using the International Classification of Functioning, Disability and Health (ICF), identifying impaired and abnormal conditions;
- development of practical skills in assessment of the functional state of the body using functional tests, questionnaires, scores; identifying abnormal conditions in patients during rehabilitation;
- development of competencies in the field of monitoring the efficacy of the medical rehabilitation of a patient.

1.2 Practical Training *B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)* as a Part of the Basic Educational Program of Higher Education of the Specialty 31.05.01 General Medicine for international students (in English), profile 02 "Healthcare" (in the field of providing primary health care to the population in medical organizations: polyclinics, outpatient clinics, inpatient/outpatient facilities of the municipal health care system).

1.2.1 *B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)* is a part of Unit B2 "Practical training" of the 31.05.01 General Medicine for international students (in English) specialty curriculum.

1.2.2 Practical training is carried out during semester No. 10.

Type of practical training: academic training;

Practical training category: introduction to medical rehabilitation and disease prevention;

Practical training method: stationary;

Practical training format: continuous.

1.3 Planned learning outcomes of practical training, correlated with the planned outcomes of mastering the basic educational program of higher education for specialty 31.05.01 General Medicine for international students (in English), profile 02 "Healthcare" (in the field of providing primary health care to the population in medical organizations: polyclinics, outpatient clinics, inpatient/outpatient facilities of the municipal health care system).

Name of Competency Category (Group)	Code and Name of Competency	Competency Indicators
General Professional Competencies		
Medical rehabilitation	GPC-8. Is able to implement and monitor medical rehabilitation of a patient, including implementation of individual rehabilitation programs and habilitation programs for people with disabilities, as well as assess ability to work of a patient	CI.GPC-8 ₁ - decides on the type of medical rehabilitation CI.GPC-8 ₂ - evaluates the results of rehabilitation measures, selects methods of monitoring the implementation of individual rehabilitation programs and habilitation programs for people with disabilities CI.GPC-8 ₃ - assesses the patient's ability to work, determines the duration of temporary disability

Planned learning outcomes of practical training are represented by knowledge, skills, abilities and experience, characterize the stages of developing competencies and ensure achievement of the planned outcomes of mastering the basic educational program. Learning outcomes of a discipline are correlated with indicators of achieving the competence.

2. SCOPE AND CONTENTS OF THE PRACTICAL TRAINING

2.1 Scope of *B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)*

Type of Activity	Total Hours	Semesters
		No. 10
		hours
1	2	3
<i>Safety briefing</i>		
<i>Work within departments overseen by practical training supervisor</i>	48	48
<i>Completing an individual task</i>	42	42
<i>Preparation of sketches of leaflets on developing healthy lifestyle skills and correcting risk factors of the most common diseases</i>	4	4
<i>Preparation for presenting a report on carrying out a part of a research activity</i>	4	4
<i>Filling out the Practical Training Log</i>	6	6
<i>Preparation for interim assessment</i>	4	4
Type of interim assessment	graded test (GT)	GT
TOTAL: TOTAL credit value	hrs.	108
	credits	3

2.2. Sections of Practical Training, Types of Activities

No.	Sections of Practical Training, Types of Activities	Hours
1	2	3
Semester No. 10		
1	Safety briefing	
2	Work within departments overseen by practical training supervisor	48
2.1	Assessment of the functional state of the body, using scores implemented as a part of rehabilitation process	8
2.2	Measurement and assessment of anthropometric data	4
2.3	Measurement of range of motion in the major joints	4
2.4	Functional tests (Frenchay Arm Test, exercise tolerance tests)	8
2.5	Choosing rehabilitation equipment and teaching the patient to use it	4
2.6	Introduction to rehabilitation methods (physiotherapy, physical therapy,	8

	reflexotherapy, manual therapy, occupational therapy)	
2.7	Mechanotherapy in rehabilitation of patients with impaired mobility (force platform, kinesiotherapy systems with body weight support)	4
2.8	Mechanotherapy in rehabilitation of patients with impaired mobility (robotized local mechanotherapy equipment, treadmills)	4
2.9	Introduction to rehabilitation methods in patients with cerebrovascular event (stroke) (patient verticalization)	4
3	Independent work of the student	60
3.1	Completing an individual task	42
3.2	Preparation of sketches of leaflets on developing healthy lifestyle skills and correcting risk factors of the most common diseases	4
3.3	Preparation for presenting a report on carrying out a part of a research activity	4
3.4	Filling out the Practical Training Log	6
3.5	Preparation for interim assessment	4
	Total:	108

2.3 Practical Training Report Forms:

Practical training log

Research activity summary

Individual assignment result (educational film)

Sketches of leaflets on developing healthy lifestyle skills and correcting risk factors of the most common diseases (in digital format)

3.2 Practical Training Requirements for Facilities and Resources

Practical training is carried out on the basis of contracts with specialized organizations that fit the following requirements: able to provide facility and resource that comply with the current fire safety rules and regulations and facilitate all types of disciplinary and interdisciplinary training, practical work and research activities of students within the scope of practical training; operate in a way that corresponds to the occupational competencies acquired within the framework of the educational program.

Practical training aimed at obtaining primary occupational skills and professional experience is carried out on specific premises that meet requirements for facilities, resources, and educational materials and include the following:

Premises and subdivisions of a medical facility fitted with medical equipment and suitable for independent work within the scope of practical training, as well as continuous assessment.

Classroom for interim assessment is equipped with specialized (classroom) furniture, teaching aids for studying and assessment of practical skills.

Equipment status of selected premises and premises for independent work is reflected on the page for facility and resource requirements of the basic educational program of higher education (specialist's degree program) on the educational organization website.

3.3. List of Information Technologies, Information and Reference Systems, Licensed and Free Software (Including Domestically-developed Software) Used for Education During Practical Training Period:

1. PolycomTelepresence M100 Desktop Conferencing Application (Videoconference system)
2. SunRav Software tTester
3. 7-PDF Split & Merge
4. ABBYYFineReader
5. Kaspersky Endpoint Security
6. INDIGO online testing system
7. Microsoft Windows 7
8. Microsoft Office Pro Plus 2013
9. 1C:University
10. GARANT system
11. MOODLE (Modular Object-Oriented Dynamic Learning Environment)

4. ASPECTS OF IMPLEMENTATION OF PRACTICAL TRAINING FOR STUDENTS WITH DISABILITIES AND SPECIAL NEEDS

4.1 Requirements of Practical Training for Students with Disabilities and Special Needs.

Students with disabilities are provided with printed and/or electronic educational materials that are adapted to their individual needs and abilities.

4.2 Aspects of Implementation of Practical Training for Students with Disabilities and Special Needs

For students with disabilities and special needs, if a written application is submitted, the practical training is carried out taking into account health limitations, individual capabilities and medical status (hereinafter referred to as individual characteristics) of the student. Location of practical training for people with disabilities and special needs is selected at the personal request of the student, taking into account the accessibility requirements. Academic training/practical placement location for people with disabilities and special needs is chosen taking into account the recommendations of the medical and social assessment that are reflected in the individual rehabilitation program with consideration of working conditions and kinds of labor.

Compliance with the following general requirements is ensured: teaching aids for collective and individual use are provided, required technical assistance is provided by an assistant, buildings and premises where the practical training is carried out meet accessibility requirements, other arrangements lack of which makes it impossible or difficult to complete the practical training are made.

When practical training is carried at the written application of the student, the following general requirements are met: practical training for students with disabilities and special needs is carried out at the same location as for students who do not have disabilities, if this does not cause difficulties for the latter; an assistant (assistants), who provide(s) students with the necessary technical assistance taking into account individual characteristics of the student, is (are) provided at the written application; necessary teaching aids are provided, taking into account individual characteristics of the student.

All internal policies and procedures of FSBEI HE PSMU of the Ministry of Health of Russia on the implementation of practical training are made available to students with disabilities in a form accessible to them.

Format of the interim assessment of academic performance within the scope of practical training conducted for students with disabilities and special needs is selected taking into account individual characteristics (orally, by writing on paper, by typing on a computer, as a test, etc.). The duration of the interim assessment in relation to the established duration is increased at the written application of the student with disabilities. Time limit for the student's preparation for the test is increased by at least 0.5 hours.

5. STAFFING REQUIREMENTS OF PRACTICAL TRAINING

Academic teaching personnel that ensure the implementation of **Б2.О.03(У) Introductory practical training (Medical rehabilitation and disease prevention)** meet the requirements of the Federal State Educational Standard of Higher Education for the 31.05.01 General Medicine for international students (in English) specialty; list of the aforementioned personnel is available on the website of the educational organization.

PRACTICAL TRAINING LOG

**B2.O.03(Y) Introductory practical training (Medical rehabilitation and
disease prevention)**

(Full name of the student)

__ Year, group No. ____, specialty 31.05.01. General Medicine for
international students (in English)

Location of practical training:

Full name and address of the practical training location

Duration of practical training:

from “ ” until “ ”

training supervisor (provided
by FSBEI HE PSMU of the
Ministry of Health of Russia)

signature

(surname, initials)

Grade

very good, good, satisfactory, unsatisfactory

Vladivostok
2025

1. Students in the specialty 31.05.01 General Medicine for international students (in English) master the practical training program in semester No.10.

Purpose: Consolidation and deeper insight into knowledge gained during theoretical training, acquisition of skills necessary for handling medical equipment, gaining experience of independent professional activity, as well as development of competencies necessary for performing work activities within the framework of labor functions of 02.009 Physician, M.D. (primary care physician, district doctor) Occupational standard.

2. Content of practical training:

- Safety briefing
- Practical classes
- Completing individual tasks
- Independent work of the student
- Conducting research activity

3. Planned practical training outcomes:

Requirements for the results of mastering **B2.O.03(Y) Introductory practical training (Medical rehabilitation and disease prevention)** include formation of the following competencies among students:

Name of Competency Category (Group)	Code and Name of Competency	Competency Indicators
General Professional Competencies		
Medical rehabilitation	GPC-8. Is able to implement and monitor medical rehabilitation of a patient, including implementation of individual rehabilitation programs and habilitation programs for people with disabilities, as well as assess ability to work of a patient	CI.GPC-8 ₁ - decides on the type of medical rehabilitation CI.GPC-8 ₂ - evaluates the results of rehabilitation measures, selects methods of monitoring the implementation of individual rehabilitation programs and habilitation programs for people with disabilities CI.GPC-8 ₃ - assesses the patient's ability to work, determines the duration of temporary disability

When mastering the practice, the student must

Know:

- scores implemented as a part of rehabilitation process;

Be able to:

- assess the physical development of a patient, measure the range of motion in the major joints, conduct functional tests;

Master:

- skills of monitoring medical rehabilitation process.

3. Assessment criteria for the level of professional competencies developed during the practical training period.

Practical training results is written into the student's transcript by the practical training supervisor (provided by FSBEI HE PSMU of the Ministry of Health of Russia); the final grade is based on the results of interim assessment in the form of test, evaluation of the Practical Training Log, characteristics of the student's work, and the results of the interview conducted by the practical training supervisor.

Forms of assessment of the level of professional competencies implemented during the practical training period:

1. Practical Training Log;

2. Review of the training supervisor.
3. Test results.
4. Independent work of the student and individual assignment results.
5. Research activity results (report on research activity results)

"Very good" - threshold or high level of competence formation in period of practice, high level of competency achievement indicators, active approach to solving professional tasks of varying degree of complexity provided for by a program of practice in accordance with the FSES HE and occupational standard.

"Good" - threshold or high level of competence formation, in period of practice, adequate level of competency achievement indicators, adequate degree of practical skills, adequate ability to solve standard professional tasks provided for by the practice program in accordance with the FSES HE and occupational standard.

"Satisfactory" - threshold level of competence formation in period of practice, threshold level of competency achievement indicators, degrees practical skills are sufficient to solve typical professional tasks provided for by the practice program in accordance with the FSES HE and occupational standard and/or qualification characteristics.

"Unsatisfactory" - threshold or lower level of formation competencies during the practice period, low level of competency achievement indicators, the level of knowledge and the degree of practical skills are not enough to solve standard professional tasks provided for by the program of practice in accordance with professional standard.

INDIVIDUAL ASSIGNMENT

Individual assignment:

- Create an algorithm for assessment of range of motion in major joints (checklist)
- Provide a conclusion on a score implemented in the rehabilitation process
- Film an educational video on the selected topic
- Conduct assessment of risk factors of a patient's lifestyle
- Prepare sketches of leaflets on developing healthy lifestyle skills and correcting risk factors of the most common diseases

Research report: fill in the report forms provide a brief description of the survey results

Independent work of the student

[illegible]

FEEDBACK

On the work and conduct of the student _____

(Full name of the student)

of group No. _____, specialty 31.05.01 General Medicine for international students (in English), who attended the **Б2.О.03(У) Introductory practical training (Medical rehabilitation and disease prevention)**

from "___" _____ 20__ until "___" _____ 20__.

Over the course of the practical training (discipline, diligence, appearance, manifestation of interest in the specialty, regularity of managing a diary, individual characteristics, moral and volitional qualities, honesty, initiative, poise, endurance etc.):
