--	---

### Assessment criteria

Level of mastery	Evaluation criteria	Number of points
Basic	A student has a solid knowledge of the material, presents it clearly and to the point, avoids significant inaccuracies in answering questions, correctly applies theoretical principles to solving practical problems and tasks, and possesses the necessary skills and techniques for completing them.	10
Threshold	A student who has only basic knowledge of the material but has not mastered its details, makes inaccuracies, insufficiently correct formulations, and lacks logical consistency in presenting the program material, and experiences difficulty completing practical assignments.	6-8
Level not reached	A student who lacks a significant knowledge of the program material, makes significant errors, and performs practical assignments with uncertainty and great difficulty. As a rule, a grade of "unsatisfactory" is given to students who cannot continue their studies without additional classes in the relevant subject.	5-0

### Social project frameworks

	Code	Competence description / name of labor function / name of work activity / text
S	31.05.01	General Medicine for international students (in English)
C	UC-1	Is able to analyze problems critically using system approach and devise a plan of action
I		<p>Framework 1</p> <p>The A. Osterwalder business model framework is a structure of nine blocks, which reflect different aspects of the project. In social projects, this framework allows one to comprehensively assess all aspects of the project, understand what its social value is, and evaluate the opportunities for optimization and development. Fill out the Osterwalder business model for your project by displaying each of the blocks, taking into account its specifics.</p>
I		<p>Framework 2</p> <p>The CJM framework (customer journey map) reproduces the path which the customer goes through from the awareness of the need for a product to its purchase, and sometimes after it. All this time he</p>

		interacts with the product and the company and makes a decision based on the experience gained. In social design, this framework allows to assess the problems that any of the stakeholders may face. Fill in the framework for possible consumers of Your project.
R2	Very good	The student has thoroughly mastered the program material, presents it comprehensively, consistently, clearly, and logically, is able to closely link theory with practice, easily solves problems, questions, and other types of knowledge application, and is not at a loss when answering modified assignments, uses material from monographs in their answers, correctly justifies one's decisions, and possesses a wide range of skills and techniques required for completing practical tasks.
R1	Good/Satisfactory	<p>The student has a solid knowledge of the material, presents it competently and to the point, avoids significant inaccuracies in answering questions, correctly applies theoretical principles to solving practical questions and problems, and possesses the necessary skills and techniques.</p> <p>The student has only basic knowledge of the material but has not mastered its details, allows inaccuracies, uses insufficiently accurate wording, lacks logical consistency in the presentation of the program material, and has difficulty completing practical assignments..</p>
R0	Fail	The student lacks a significant understanding of the program material, makes significant errors, and performs practical assignments with uncertainty and difficulty. Typically, this grade is given to students who cannot continue their studies without additional classes in the relevant subject

#### 4. Assessment criteria for learning outcomes

**"Pass"** is given to a student who has shown a sufficiently strong knowledge of the basic concepts of the subject; is able to complete specific practical tasks outlined in the program with no outside help, use recommended reference material, and correctly evaluate the results.

**"Fail"** is given to a student who has significant gaps in knowledge of the basic concepts of the subject, is not able reach the correct solution to a specific practical task outlined in the curriculum even with outside help.
